QOMPLX:

Professional Services

Customized cyber assessments and expert guidance

No two organizations are alike, so we provide tailored cyber services that fit your firm. Whether you're new to cybersecurity, have specific and well-defined needs, or are simply looking for expert guidance you can trust, we meet you where you are.

QOMPLX works with all sizes of organizations, ranging from just a few employees to some of the largest firms in the world. Our world-class cyber experts in defensive and offensive security employ a combination of open-source and proprietary tools along with manual methods to assess your cybersecurity maturity and then provide expert guidance for your path forward.

Active Directory security assessment

Assesses the security of an organizations Active Directory (AD) environment, including susceptibility to ransomware and other critical risks. Our expert team evaluate the ability to enforce least-privilege principles, harden directory configurations, tighten access controls, audit changes, and remain resilient to catastrophic breaches.

Security program assessment

Assess the posture of an organizations security program compared to industry baselines such as NIST 800-53 and the CIS Controls. The team identifies areas of strength and deficiencies against the standard, along with a roadmap and recommended plan to address gaps.

Cloud security assessment

Moving to the cloud or already there our team can help assess the security of your cloud environments including Azure, AWS, and GCP. Practical recommendations to reduce risk and monitor your critical cloud assets.

Offensive security services

Our offensive security team uses ethical hacking to find security gaps by conducting authorized simulation attacks and penetration tests against on premise and cloud environments. Friendly approach and customized engagements to meet your security objectives.

Attack surface reduction

Trust QOMPLX to bring an expert cybersecurity lens to your due diligence and third-party risk management. You would never buy a building without having a building inspector check it out, right? Treat your acquisitions the same way. Our experts use automated and manual investigative techniques to shine a light on your attack surface.

Virtual CISO and advisory

Fulfills the role of a Chief Information Security Officer (CISO) and provides broad strategic and tactical guidance on a customer's cyber security program.

Why QOMPLX®

QOMPLX harnesses data to provide unified visibility into cyber risks and trust in identity. QOMPLX solutions reduce cyber risk and attack surfaces by mapping exposures and performing real-time detection of attacks. This approach increases network observability by closing the largest remaining gaps in cybersecurity: identity verification, cross-tool data fusion, and data interoperability. QOMPLX defends some of the world's most renowned brands by re-establishing trust for client organizations, assuring authentication, and enabling confident security decisions.
