QOMPLX:CYBER

Active Directory Security Assessment

QOMPLX Active Directory (AD) Security Assessment helps to identify and mitigate security risks to your environment. QOMPLX provides a complete assessment of your AD architecture specifically designed to identify gaps in your AD structure. Our experts use a variety of approaches including scanning and auditing of IT support processes and configurations.

QOMPLX's Privilege Assurance collects AD configuration data to assesses the security of your environment including:

- Gauging your susceptibility to ransomware and other critical threats
- Evaluation of your organization's resilience to catastrophic events or breaches
- Measurement of your organization's ability to enforce least-privilege principles, harden directory configurations, and tighten access controls and review changes

Our assessment will provide actionable remediation recommendations to mitigate cybersecurity risks and align your AD environment with Microsoft and the latest cybersecurity best practices.

Approach

QOMPLX uses an integrated approach leveraging both scanning of your AD environment and a series of discovery techniques to assess the current AD posture, while analyzing for opportunities for improvement. Our team, led by a dedicated project manager that will keep your project on track, will provide realistic and measurable recommendations for improvement to strengthen your cybersecurity and operational posture. QOMPLX security professionals will be in contact throughout the engagement and will work closely with your team to ensure there is a collaborative environment with open communication.

Benefits

- Increased visibility into your AD environment
- Blueprint for ransomware prevention and preparation
- Supports cybersecurity mesh strategy and improved operational resilience
- Insight into complex relationships, revealing unknown attack paths
- Actionable recommendations for improving your cybersecurity posture
- General assessment of the critical IT processes supporting Active Directory

QOMPLX:CYBER

Deliverables

AD Assessment Report: Details the strengths and weaknesses of your AD environment. The report will provide prioritized and actionable recommendations to remediate AD security and significantly reduce cybersecurity risks. Topics for analysis include: AD configuration, policy, entitlements, dependencies, operations and resilience.

Executive Outbrief: Highlights positive findings and provides observations, remediation recommendations, and strategic guidance for improvement to key stakeholders.

Why QOMPLX®

QOMPLX harnesses data to provide unified visibility into cyber risks and trust in identity. QOMPLX solutions reduce cyber risk and attack surfaces by mapping exposures and performing real-time detection of attacks. This approach increases network observability by closing the largest remaining gaps in cybersecurity: identity verification, cross-tool data fusion, and data interoperability. QOMPLX defends some of the world's most renowned brands by re-establishing trust for client organizations, assuring authentication, and enabling confident security decisions.
