QOMPLX defends apex controls – identity and privilege

1.

One of the world's leading trading and investment firms needed a unified defense platform to protect its core assets: intellectual property and customer data.

2.

With QOMPLX's Identity Assurance and Privilege Assurance software, the client is able to visualize its entire network and has a continuous real-time understanding of its connected assets.

Challenge

Amid increasing cyber threats and mounting regulatory compliance pressure, a leading trading and investment firm needed a unified defense platform to protect its core assets: intellectual property, and customer data, and operations integrity.

The cost-effective, streamlined platform had to include:

- Asset management, identification, and enumeration
- Vulnerability management
- Active Directory and Kerberos authentication security
- User behavior analytics
- Data loss prevention
- Machine learning proficiency
- Incident response expertise

After evaluating several cyber SaaS managed security services providers and managed detection and response companies, the solution was clear: QOMPLX.

INDUSTRY:	Finance & Insurance
HEADQUARTERS:	North America
EMPLOYEES:	~100
OFFICES:	North America
SELECT SERVICES:	Asset Management
ANNUAL REVENUE:	USD Millions

Solution

With QOMPLX's Managed Detection & Response, and powerful software-as-a-service analytics platform, the client has the operational team and unified defense platform it needs to visualize its entire network with continuous real-time understanding of its connected assets.

QOMPLX's complimentary VCISO advisory service helps with on-demand cybersecurity strategy and expertise to ensure compliance with various applicable regulations, while developing and implementing policies, procedures, and programs for enterprise-wide cyber security management.

QOMPLX helped the client develop and deploy a state-of-the-art incident response program to identify, categorize, and respond to incidents, integrating these capabilities with existing operational controls, data and enterprise security tools.

Impact

The client's internal operations team members can collaborate with security professionals and dynamically interrogate assets to determine what systems and processes are effectively running—a key capability for effective threat hunting and investigation activities.

Leveraging QOMPLX's unique Kerberos protocol monitoring and authentication validation, the client also benefits from comprehensive identity assurance coverage including confidence that any forged Golden or Silver Ticket activity will be deterministically detected in seconds and that any attacks involving rogue DCs (e.g. DCSync or DCShadow) will be thwarted.

Identity secured. Logs handled. Hunting operationalized. Confidence restored.

> With QOMPLX's Identity Assurance and Privilege Assurance software, the client can visualize its entire network and has a real-time understanding of its IT assets and users' identities

Why QOMPLX®

QOMPLX harnesses data to provide unified visibility into cyber risks and trust in identity. QOMPLX solutions reduce cyber risk and attack surfaces by mapping exposures and performing real-time detection of attacks. This approach increases network observability by closing the largest remaining gaps in cybersecurity: identity verification, cross-tool data fusion, and data interoperability. QOMPLX defends some of the world's most renowned brands by re-establishing trust for client organizations, assuring authentication, and enabling confident security decisions.
