

Justice is Blind

Q:CYBER™ secures growth for top-ranked global law firm

1.

When a top global law firm saw what happened with Mossack Fonesca, they knew they couldn't afford a similar breach.

2.

They retained QOMPLX to use its Q:SCAN, Privilege Assurance, and Identity Assurance software with QOMPLX's OSINT and MDR services to secure their aggressive, acquisition-based, growth strategy.

3.

With QOMPLX's unmatched, always-on, pre-acquisition and cybersecurity due diligence support, the client can grow without fear.

Challenge

Mossack Fonesca suffered a catastrophic data breach in 2016 when an anonymous source leaked 11.5 million files from the Panama-based law firm's 200,000 clients, including prominent politicians, secretive firms, and wealthy individuals.

Experts found that the firm had not encrypted emails, was running outdated and vulnerable software, its network architecture was insecure, and their content management system had not been secured from SQL injection.

When one of the world's top law firms saw what happened at Mossack Fonesca, they knew they couldn't afford a similar fate. QOMPLX's industry-leading suite of cloud-based cybersecurity software and services, Q:CYBER, was the solution.

INDUSTRY:	Legal Services	
HEADQUARTERS:	Global	
EMPLOYEES:	Thousands	
OFFICES:	Dozens, globally	
SELECT SERVICES:	<ul style="list-style-type: none"> ■ Arbitration ■ Banking & Finance ■ Corporate Legal Services ■ Energy 	<ul style="list-style-type: none"> ■ IP and Technology ■ Media ■ Real Estate ■ Telecommunications
ANNUAL REVENUE:	USD Billions	

Solution

In 2018, QOMPLX was retained to design and implement a pre-acquisition cybersecurity due diligence program and global program uplift to support the firm's acquisition-based, growth strategy.

Build a sustainable M&A risk program to identify and fix cyber exposures in acquisition targets. Scan and assess the client's and its targets' internal and external cybersecurity assets and postures.

Minimize your mess with Privilege Assurance

Map trusts, spot configuration weaknesses, identify stale accounts, and identify overpermissioned accounts.

Protect every authentication with Identity Assurance

Spot attacks on any of the client's Domain Controllers and member servers.

Gain insights

Visibility into the Windows Event Log data complements Privilege Assurance and Identity Assurance with even more insights.

Impact

Since first launching the three-part, pre-acquisition cybersecurity due diligence program for its client in 2019, QOMPLX has monitored the security posture of its client and the client's acquisitions 24x7.

With QOMPLX's unmatched, always-on, pre-acquisition and cybersecurity due diligence support, the client can aggressively grow with the ability to make risk-based decisions — outside in plus inside out view of risk.

QOMPLX secured their client's data, which enabled this top global law firm to launch multiple new offices in the next year

Why QOMPLX®

QOMPLX harnesses data to provide unified visibility into cyber risks and trust in identity. QOMPLX solutions reduce cyber risk and attack surfaces by mapping exposures and performing real-time detection of attacks. This approach increases network observability by closing the largest remaining gaps in cybersecurity: identity verification, cross-tool data fusion, and data interoperability. QOMPLX defends some of the world's most renowned brands by re-establishing trust for client organizations, assuring authentication, and enabling confident security decisions.
